

# DOWNPOURS AND DROUGHT Managing for Extremes

Wednesday October 26, 2016 4:45 - 7:30 pm

*(A light dinner will be available at 5:45 pm)*

*Hugh Gregg Coastal Conservation Center, 89 Depot Road, Greenland, N.H.*

FOR: MUNICIPAL BOARDS      COMMUNITY ORGANIZATIONS      INTERESTED CITIZENS

**Presenters:**

- **Rob Roseen**, Waterstone Engineering
- **Barbara McMillan**, NH Department of Environmental Services
- **Lisa Loosigian**, NH Department of Environmental Services
- **Julie LaBranche**, Rockingham Planning Commission
- **Sherry Godlewski**, NH Department of Environmental Services

Indoor and Outdoor presentations and discussions will focus on **what communities can do to manage and sustain their water resources in the face of climate change.** Join Seacoast community and CAW members to:

- Become more familiar with opportunities and challenges in managing water resources during drought and flood events.
- Learn from a local example how green infrastructure can be implemented as a flood management strategy.
- Learn how rain gardens, porous pavement systems, green roofs and rain barrels can function as water management practices and what they look like installed.

Workshop is **FREE**, but space is limited— Please register by noon on Monday Oct. 24, 2016.
